

The College of Business Administration has proudly sponsored the First Annual Symposium to explore and share the findings of research papers conducted by CBA professors, Language Teachers and Teacher Assistants from all Departments. This Event took place on the 24th of October, 2017, to allow researchers to present their material during a five-session symposium that took place in Hall number A2. Moreover, these sessions were directed by department chairs whilst divided based on majors and similar areas of specialty and interest. All staff members of CBA were invited and cordially attended along with our students who all showed appreciation and reflected great morale. The feedback was superfluous and more than excellent. This symposium has brought the College together on all frontiers and all domains leaving us looking forward to the next event with more research outcomes to be shared publically and valued.
